SUMMARY

Full-stack engineer with ~3 years in MERN stack and AI , specializing in production AI systems : RAG over PostgreSQL/pgvector, multi-provider LLM integration, and high-volume document pipelines. Track record of 65% fewer hallucinations, 40% lower retrieval latency, 10,000+ documents indexed, and 40+ hours of manual work automated weekly across 4 live products in healthcare, fintech, legal-tech, and government fundraising.

WORK EXPERIENCE

Software Development Engineer - 1, Hyscaler 01/2024 – Present | Bhubaneswar , Odisha

- Engineered and deployed **scalable backend and AI-driven applications** using Node.js, NestJS, React.js, Next.js, PostgreSQL, MongoDB, and Docker, contributing to **4 live production projects** across **healthcare, fintech, legal-tech, and government fundraising**.
- Designed **Retrieval-Augmented Generation based AI systems** using Node.js, PostgreSQL/pgvector, and OpenAI APIs, reducing hallucinations by **65%** and improving response accuracy on domain-specific queries.
- Architected scalable document processing pipelines for parsing, **chunking, embedding, and indexing 10,000+ documents**, enabling **semantic and lexical search** across enterprise knowledge bases.
- Optimized AI retrieval using **hybrid dense + sparse search** and metadata filtering, reducing query latency by **40%** while achieving **90%** retrieval relevance.
- Integrated **OpenAI, Anthropic, and Mistral LLMs** into production workflows across document analysis, knowledge retrieval, and business automation.
- Developed **bidirectional synchronization** for medical devices and physician dashboards using **WebSockets and FHIR APIs**, achieving 100% compliance with HIPAA data transmission standards for critical patient information.
- Parallelized high-volume CSV processing in Node.js using **Worker Threads** to handle **10K+ records** daily, improving performance by **50%** while maintaining **99.9% data accuracy**.
- Deployed robust production solutions for **Doctegrity** (healthcare), **R4Funds** (fundraising), **LexRoss** (legal AI), and **MerQube Hyally** (fintech) enhancing critical business operations.

SKILLS

- AI / Machine Learning:** Agentic AI, LLMs, RAG , Vector Databases, Embeddings, Prompt Engineering
- Backend:** Node.js, NestJS, Express.js, GraphQL, REST APIs, WebSockets, Worker Threads
- Frontend:** React.js, Next.js, React Native
- Databases & DevOps:** PostgreSQL, MongoDB, AWS(Amazon Web Services), S3 ,pgVector, Docker, Git, Linux

EDUCATION

Bachelor of Technology (IT), Veer Surendra Sai University Of Technology 11/2020 – 05/2024 | 8.61 CGPA

Higher Secondary Education (12th CBSE , PCMB), DAV Bistupur , Jamshedpur 05/2018 – 05/2019 | 88.4 %

Secondary Education (10th ICSE), J.H. Tarapore School , Jamshedpur 05/2016 – 05/2017 | 92.4 %

PROJECTS

JobPilot , AI job discovery, resume tailoring & assisted apply 05/2026 – 09/2026

- Scans **16,500 live job postings** and shortlists the ones worth applying to, rule-based filters cut **~90%** before the paid AI step (PostgreSQL/pg-vector, local embedding, prompt caching).
- Rewrites the resume per job with a **guard that blocks the AI from inventing facts**; pulls from **6 hiring platforms** and auto-fills applications, **stopping before submit** (Playwright, Claude).
- Runs **fully unattended**, daily cron fetches at 6 AM, ranks at 7 AM, emails/Telegrams the shortlist by 9 AM (NestJS cron + BullMQ workers, Redis).

KlarText , AI assistant for German bureaucratic paperwork 01/2026 – 03/2026

- Turns dense **German paperwork** — rental contracts, tax notices, visa letters — into a plain-language summary with a **risk level** and key details, **translated into the user's own language** (Gemini, Llama 3 70B).
- Extracts every deadline into a dated action item and calendar event across **5 task categories** , with per-document **chat for follow-ups**, all on a swappable 2-provider **AI layer** (Gemini, Groq Llama 3 70B) that retries **up to 3*** with exponential backoff on rate limits (NestJS, TypeORM, PostgreSQL).

Walking Pal , The First Walking Buddy App 06/2023 – 12/2023

- Built the social and events core : **WebSocket chat, QR-code friend connections**, push notifications, and **geolocation-based walk discovery** with calendar sync , powering **500+ community walks** a month and a **23% lift in daily active users**.
